
ALLERGEN REPORT

PRODUCT NAME: CHRISTMAS ELF TREATS

PRODUCT NUMBER:

RIFM and IFRA have formally adopted the Quantitative Risk Assessment refined for fragrance ingredients identified as contact allergens, as the core strategy for primary prevention of dermal sensitization to these materials in consumer products. This methodology will be used to determine global fragrance industry product management practices following the current IFRA Standards for potentially sensitizing fragrance ingredients. The basis for the acceptable exposure limits are presented in this paper.

<u>Name</u>		<u>CAS</u>	<u>Percent</u>
GERANIOL		106-24-1	0.00
CINNAMAL		104-55-2	0.70
BENZYL BENZOATE	TP	120-51-4	8.86
COUMARIN	TP	91-64-5	4.50
LINALOOL	TP	78-70-6	1.15
ISOEUGENOL		97-54-1	0.00
EUGENOL		97-53-0	2.00
D-LIMONENE		5989-27-5	0.01

IFRA recommendations for products containing substantial amounts of d, l and dl-Limonene that they should only be used when the level of peroxides are kept to the lowest practical level by adding antioxidants at the time of production.

The Scientific Committee on Consumer Products in Annex III (Directive 76/768/EEC) includes a list of 26 potentially sensitizing fragrance ingredients requiring the presence of these substances must be indicated in the list of ingredients on the label when their concentrations in the final product exceed 0.001% in leave-on products or 0.01% in rinse-off products (2003/15/EC).

The information contained herein is to the best of our knowledge, true and accurate at the time it is given. It is your responsibility to ensure that the usage of the fragrance ingredients and the levels of such usage are permitted at all times according to the relevant laws and regulations.
